

ACHARYA INSTITUTE OF TECHNOLOGY

Department of Physics

5-Day Workshop On Build Your First Smart Device: IoT for Beginners

About the Program

- The program introduces second-semester engineering students to the fundamentals of the Internet of Things (IoT).
- Demonstrates simple real-time IoT applications and practical implementations.
- Combines conceptual learning with hands-on experience in IoT technologies.
- Helps students understand how everyday objects can be connected, monitored, and controlled using modern systems.
- Provides insight into the architecture and working principles of IoT systems.
- Covers the basic components of IoT, including sensors, microcontrollers, and communication protocols.
- Develops problem-solving skills through real-world IoT use cases.

**11th to 15th
May 2026**

02:30 PM to 05:30 PM

Venue: Acharya Campus
