

ACHARYA INSTITUTE OF TECHNOLOGY

Department of MCA

Five Days FDP on Transforming Workplace Productivity with Generative AI

About the Program

- To equip faculty members with practical skills in using generative and agentic AI tools for automating academic, administrative, and institutional workflows.
- To enable participants to design intelligent AI-assisted solutions for teaching–learning enhancement, smart office productivity, multimedia content creation, and academic application development.
- To empower researchers to accelerate scholarly activities through AI-driven literature analysis, research structuring, journal selection, and publication-ready academic writing workflows.
