ACHARYA INSTITUTE OF TECHNOLOGY
Department of Computer Science & Engineering and Information Science & Engineering

All Girls Hackathon
### Edition 4 | 2026

In association with NSS, AIT, Yuvaka Sangha and TechDiva Foundation

In Association With

About the Program

- In commemoration of National Girl Child Day (24 January 2026), Acharya Institute of Technology will organize an All-Girls Hackathon in collaboration with the NGO TechDiva.
- The hackathon is exclusively designed for girl students from nearby schools, with a special focus on encouraging participation from government schools.
- The event aims to empower young learners by providing hands-on exposure to coding, logical thinking, and problem-solving in a structured hackathon environment.
- Participants will be invited to the Acharya campus and engage in a full-day program of guided coding sessions, mentorship interactions, and team-based challenges.
- Activities are designed to foster creativity, confidence, collaboration, and innovation among the participants.
- The hackathon will create an inclusive and motivating learning atmosphere, enabling students to explore technology beyond traditional classroom settings.
- Faculty members, student volunteers, and TechDiva mentors will provide continuous guidance and encouragement throughout the event.
- Hosting the hackathon on campus will offer early exposure to higher education and engineering environments.
- The initiative aims to inspire girls to pursue careers in science, technology, and engineering.
- The event reinforces Acharya Institute of Technology's commitment to social responsibility, gender equity, and community engagement.

24th January 2026
