

# ACHARYA INSTITUTE OF TECHNOLOGY

Department of Physics

## Click, Connect, Create Virtual Circuit Lab

### About the Program

- The event introduces second-semester ECE students to semiconductor components through simulation-based experiments.
- Explore the working principles of diodes, transistors, sensors, and other electronic devices.
- Design and test virtual electronic circuits using simulation software.
- Analyze the performance and characteristics of semiconductor components in different conditions.
- Bridge theoretical concepts with practical understanding through hands-on digital learning experiences.

**2<sup>nd</sup> June 2026**

**1:40 PM TO 3:30 PM**

**Venue:** Acharya Campus
