## HR In 2035: From People Management To Human Potential Engineering

- HR Summit 1.0 explores the future of HR over the next decade, shifting from traditional management to strategic, tech-driven human potential development
- Understanding HR's transition to AI, analytics, and Industry 5.0–driven human potential engineering
- Bridging skill gaps by exposing students to future-ready HR competencies such as analytics, digital HR, and workforce strategy
- Examining how AI, automation, and digital tools are transforming recruitment, learning and development, performance, and employee experience
- Encouraging a shift from operational roles to strategic positions like HR Business Partner and CHRO
- Promoting well-being, DEI, sustainability, ethical AI, and responsible workforce practices

**30<sup>th</sup> April 2026**

**10 AM Onwards**

Venue: Main Auditorium, Acharya Campus
