

ACHARYA INSTITUTE OF TECHNOLOGY

Department of Electronics & Communication Engineering

2nd International Conference on Advance Communication and Computational Devices ICACCD 2026

About the Program

- Development of electronic components and systems beyond traditional circuitry.
- Includes innovations in semiconductors, integrated circuits, sensors, and other electronic devices.
- Focus on miniaturization, increased processing power, and energy efficiency.
- Computational devices perform computations or process information.
- Range from traditional computers and servers to supercomputers, quantum computers, and AI systems.
- Aim to enhance computational capabilities, speed, and efficiency.
- Synergy of advanced electronics and computational devices drives remarkable advancements.

7th & 8th
March
2026

Organising Chair Prof. Devasis Pradhan, Asst. Director of Research, Acharya Institutes.

09:00 AM to 05:00 PM

Place Main Auditorium,
Acharya Campus

Dr. Jaume Anguera

Associate Professor at Universitat Ramon Llull,
IEEE Distinguished Professor United Kingdom.

Prof. David Banjerdpongchai

Chulalongkorn University,
Bangkok, Thailand
