

ACHARYA INSTITUTE OF TECHNOLOGY

Department of Physics

Technical Talk On Natural Products

About the Program

- The program introduces the first-year Biotechnology students to the fundamentals and classification of natural products.
- It highlights the sources and biological importance of bioactive compounds from plants and microorganisms.
- Explains the applications of natural products in medicine, agriculture, food, and industrial biotechnology.
- Encourages the students to explore research, innovation, and sustainable practices in natural product biotechnology.
- Provides awareness about extraction, screening, and analysis methods used in natural product research.
- Creates an interactive learning platform through expert insights from industry and scientific professionals.

18th May 2026

9:45 AM TO 12:40 PM

Venue: Mechanical Seminar Hall, Acharya Campus
