### About Program

The program focuses on innovation, digitalization, sustainability, entrepreneurship, and interdisciplinary problem-solving. Students are encouraged to work on projects using technologies such as Artificial Intelligence, Machine Learning, IoT, Data Analytics, Robotics, Automation, and Digital Technologies. The program provides a platform for students to explore emerging technologies, apply engineering knowledge, and transform creative ideas into practical solutions.

### Objectives of the Program

- To Provide a collaborative platform for students to develop and showcase innovative solutions for technological advancement and sustainable societal impact.
- To Encourage students to develop innovative, technology-driven solutions for real-world challenges through engineering and interdisciplinary collaboration.
- To Promote multidisciplinary collaboration while developing leadership, communication, project management, and entrepreneurial skills to transform ideas into impactful solutions.
