About Program

The Value Added Program (VAP) on "AI-Powered Research Paper Drafting: From Idea to Publication" is designed to introduce students to the use of Artificial Intelligence tools in research and academic writing. The program will guide students through selecting research ideas, literature review, identifying research gaps, drafting research papers, managing references, checking plagiarism, and selecting suitable journals. It aims to develop students' research skills and help them use AI tools effectively and responsibly for academic publication.

Objectives of the Program

- To familiarize participants with AI-powered tools that can assist in literature search, research ideation, paper structuring, and academic writing.
- To develop skills in formulating research problems, objectives, research questions, and appropriate research methodologies with the assistance of AI tools.
- To demonstrate effective techniques for drafting different sections of a research paper, including the abstract, introduction, literature review, methodology, results, discussion, and conclusion.
