

Five Days FDP

on Transforming Workplace Productivity with Generative AI

19th to 23rd January, 2026 | 09:30 AM to 04:30 PM

Venue: Seminar Hall, ANA Block, Acharya Campus

Objectives of the Program

- To equip faculty members with practical skills in using generative and agentic AI tools for automating academic, administrative, and institutional workflows.
- To enable participants to design intelligent AI-assisted solutions for teaching–learning enhancement, smart office productivity, multimedia content creation, and academic application development.
- To empower researchers to accelerate scholarly activities through AI-driven literature analysis, research structuring, journal selection, and publication-ready academic writing workflows.

Expected Outcomes of the Program

- Participants will be able to independently deploy generative and agentic AI tools to automate routine academic and administrative tasks with improved efficiency and accuracy.
- Faculty members will design AI-assisted applications and intelligent workflows for teaching enhancement, student analytics, institutional planning, and multimedia content development.
- Researchers will demonstrate the ability to accelerate the complete research lifecycle—from literature review to journal-ready manuscript preparation—using AI-driven scholarly publishing frameworks.
