

# Practical C Programming Concepts and Applications

22<sup>nd</sup> to 26<sup>th</sup> September 2025 | 9AM to 5 :20 PM

Main Auditorium, Acharya Campus

## About the Program

The Value-Added Program on C Language for 3rd semester students is aimed at strengthening their programming fundamentals and enhancing problem-solving skills. The program provides hands-on training in core concepts such as arrays, pointers, functions, and file handling, enabling students to build a strong foundation in coding. Through practical sessions, exercises, and mini-projects, students gain real-time exposure to applying programming logic effectively. This initiative not only boosts their confidence in programming but also prepares them for advanced courses and future placement opportunities.

### Objectives of the Program

- To build a strong foundation in programming concepts using C language.
- To develop logical thinking and problem-solving skills through structured programming.

### Expected Outcomes of the Program

- Students will be able to write, compile, and debug C programs independently.
- Students will gain confidence to apply C programming skills in advanced courses and projects.

**Target Audience:** Information science and Engineering 3rd semester students
