

## ACHARYA'S NR INSTITUTE OF PHYSIOTHERAPY

# Neurodevelopmental Therapy (NDT) in Managing Stroke-related Hemiplegia

This introductory workshop gives Physiotherapists a hands-on overview of the NDT Enablement Model for managing adults with Stroke and Acquired Brain Injury. It focuses on movement and task analysis using the ICF framework, helping participants identify abnormal movement patterns and apply targeted treatment strategies. Through case discussions and lab sessions, attendees develop clinical reasoning skills to design functional, goal-oriented rehabilitation plans.

**27<sup>th</sup> February, 2026**
