ACHARYA POLYTECHNIC

Value Added Program on CODEX

The Value Added Program-CODEX is intended to foster the logical, analytical, and problem-solving abilities necessary for today's digital world while providing a solid foundation in programming. This course helps students grasp how code functions and how it can be used to solve problems in the real world by introducing them to fundamental programming concepts in an organized and useful way. After finishing, participants will be able to develop simple applications, independently apply fundamental programming concepts, and show that they are prepared to tackle more challenging coding tasks.

10th to 12th February, 2026

10:00 AM to 04:00 PM

Venue ANA Block, Acharya Campus

SPEAKERS

Prof. Deeksha Satish
Assistant Professor, Department of CSE
Acharya Institute of Technology
