

WORKSHOP ON MACHINE EMBROIDERY FROM USHA COMPANY

14th July 2025 | 01:00 pm to 04:00 pm

ASD Block AI031F16-LH, Acharya Campus

About the Program

The Workshop on Machine Embroidery, organized by Acharya Polytechnic in collaboration with Usha International Ltd., aims to introduce students to the art and technology of modern machine embroidery. This hands-on skill development session provides participants with practical training on advanced Usha embroidery machines, emphasizing creativity, precision, and innovation in textile design.

Through expert guidance from Usha professionals, students will explore various stitching techniques, design patterns, and machine functionalities that are essential in the fashion and garment industry. The program is tailored to enhance vocational skills, promote self-employment opportunities, and bridge the gap between academic learning and industry demands.

Objectives of the Program

- Understanding embroidery machine basics
- Learning embroidery software and design principles
- Mastering various embroidery techniques and stitches
- Troubleshooting common machine issues
- Creating custom embroidery designs and products

Expected Outcomes of the Program

- Provide ample hands-on practice to ensure students gain practical experience
- Invite industry experts to share insights, trends, and best practices
- Facilitate networking among participants, instructors, and industry professionals
- Creating custom embroidery designs and products

Target Audience: ADFT Students & Faculties

Committee Members
